

If you are already registered with an NHS dentist and need to make an appointment for routine treatment, please [contact your dental practice directly](#).

If you are not currently registered with an NHS dentist, you can apply for a place online if:

- You are aged 16 or over
- You have not had routine NHS dental treatment in Wales in the past four years
- You live at an address in North Wales, for more than six months of the year or are registered with a GP in the area.

You can use the Dental Access Portal to apply for a place with an NHS dentist as an individual and you can add someone else, such as a child under 16.

You can also apply on behalf of others, such a family member, friend or someone you care for or have a trusted relationship with.

Your previous dental practice should be able to offer you an appointment if you have had treatment with them in the last four years.
